THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Elizabeth Hall on 14 April 2008.

The application has been amended as follows:

Claims 1 and 3-12 are cancelled.

In Claim 13: On line 15, delete the word "comprising."

Allowable Subject Matter

Claims 13-18, 23 and 24 are allowed.

With respect to independent claim 13, the prior art does not disclose, in the claimed environment, a support cylinder comprising a blind hole in communication with a plurality of radial cross holes extending to the exterior surface of the cylinder. As persuasively argued by Applicant, the Schwarz '650 reference only discloses the use of a single radial cross hole in communication with a blind hole. The current invention uses multiple radial cross holes to evenly distribute the circulating fluid through the liquid circulation system, whereas the single

cross hole of Schwarz '650 creates pressure on one side of the membrane and therefore does not allow for the optimum diffusion of biochemicals through the membrane.

The Rigopulos (US 3682318) and Agranat (US 3722694) references also represent pertinent prior art in that they disclose the use of a fluid chamber that includes a plurality of membrane carrier assemblies each comprising a support cylinder, a molecular weight cut-off membrane, and a chamber. Rigopulos and Agranat do not, however, disclose that the support cylinder has an axial blind hole aligned with a through bore and in communication with a plurality of radial cross holes.

With respect to independent claim 18, prior art does not disclose, in the claimed environment, a support cylinder comprising a blind hole in communication with a plurality of radial cross holes extending to the exterior surface of the cylinder to create a plurality of surface pockets. As persuasively argued by Applicant, the Schwarz '650 reference only discloses the use of a single radial cross hole in communication with a blind hole. The current invention uses multiple radial cross holes to evenly distribute the circulating fluid through the liquid circulation system, whereas the single cross hole of Schwarz '650 creates pressure on one side of the membrane and therefore does not allow for the optimum diffusion of biochemicals through the membrane.

The Rigopulos (US 3682318) and Agranat (US 3722694) references also represent pertinent prior art in that they disclose the use of a fluid chamber that includes a plurality of membrane carrier assemblies each comprising a support cylinder, a molecular weight cut-off membrane, and a chamber. Rigopulos and Agranat do not, however, disclose that the support

cylinder has an axial blind hole aligned with a through bore and in communication with a plurality of radial cross holes.

With respect to claim 24, the prior art does not disclose, in the claimed environment, a plurality of membrane carrier assemblies each transversing the growth compartment and each including a support cylinder, a molecular weight cut-off membrane, and a chamber containing circulating culture medium. The Schwarz '035 and Schwarz '650 references represent the closest prior art, but each only disclose a single membrane carrier assembly. Furthermore, the Schwarz references do not disclose that the support cylinder comprises a blind hole in communication with a plurality of coplanar radial cross holes. The Schwarz references do not disclose the use of surface pockets constructed on the exterior surface of the cylinder.

The Rigopulos (US 3682318) and Agranat (US 3722694) references also represent pertinent prior art in that they disclose the use of a fluid chamber that includes a plurality of membrane carrier assemblies each comprising a support cylinder, a molecular weight cut-off membrane, and a chamber. Rigopulos and Agranat do not, however, disclose that the support cylinder has an axial blind hole aligned with a through bore and in communication with a plurality of radial cross holes. Rigopulos and Agranat do not disclose the use of surface pockets constructed on the exterior surface of the cylinder.
